

## Installing VirtualBox

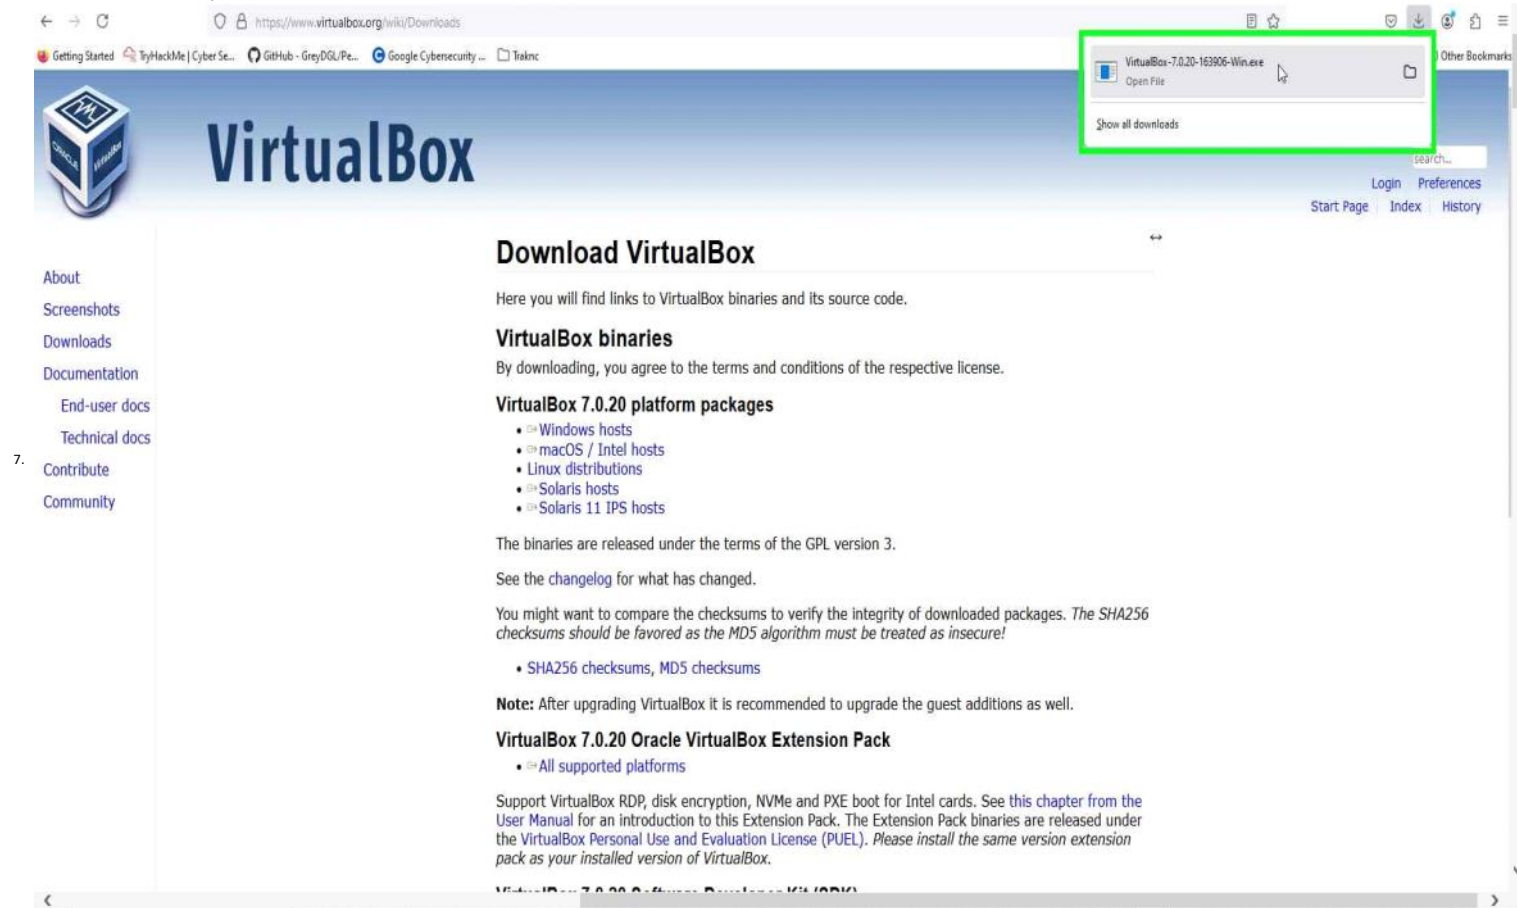

1. Go to this website by clicking on the hyperlink <https://www.virtualbox.org>
2. Head over to the downloads tab as seen here

3. Select your host machine and click it as seen in the below screen shot

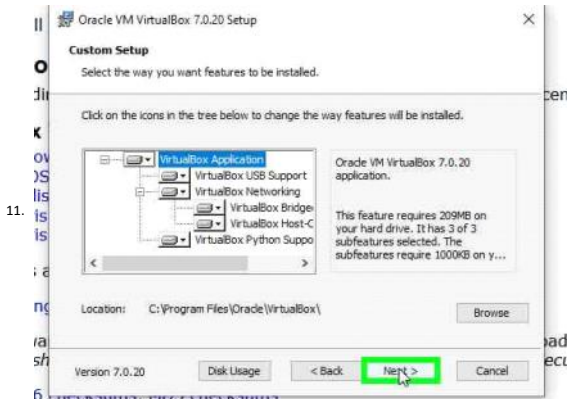

6. You will then see a downloads tab in your browser and when it is finished, click on it as seen here

8. Next, you will follow the instructions of the installer by clicking **NEXT** as seen below

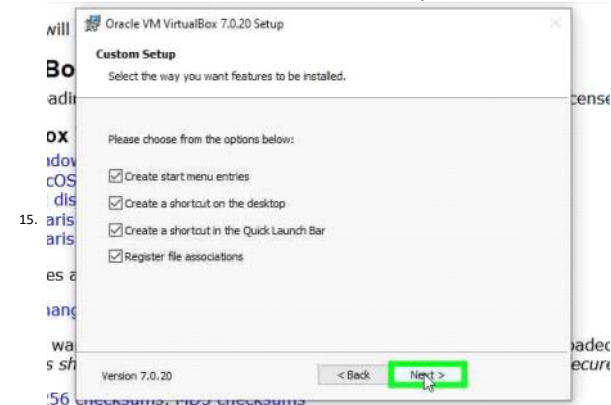

10. Continue the **NEXT** button

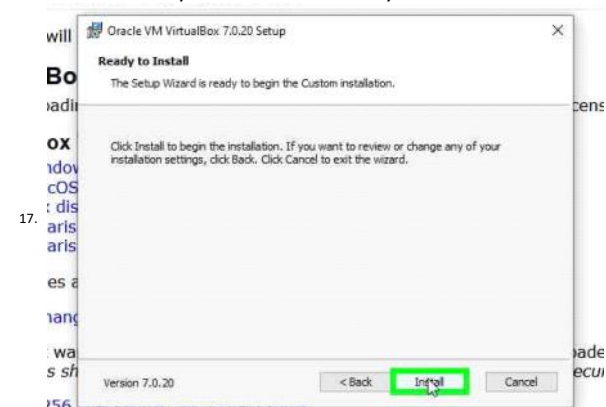

12. You will see this WARNING but it is ok to click **YES**

14. Continue with the **NEXT** button when you see this

16. You will finally see this screen and you can click **INSTALL**

18. Once the installation is complete, you will see this screen and then you have completed your installation of VirtualBox!
